

Certificate of Analysis

Product Name/Description: DTI FabSpin Universal DNA extraction Kit

Cat#: DT9701.25P

Lot#: Specified on product label

Storage conditions: Room temperature

Expiry: Specified on product label

Pack size: 25 Preps

Package contents:

Component	Quantity
Proteinase K (lyophilised)	1 vial
Proteinase K reconstitution buffer	1 vial
Buffer GL	6 ml
Buffer GB	6 ml
Buffer WA	14 ml
Buffer WB	12 ml
Elution buffer	7 ml
PBS	5 ml
Nuclease free water	1.25 ml
Spin columns	25 pcs
Collection tubes	25 pcs

Quality Control data:

Yield and Purity test:

The average yield of genomic DNA from carp tissue by using this product was between 10- 20 µg. The ratio of A260/A280 of the genomic DNA solution was from 1.8 to 2.2.

PCR Amplification test:

Expected amplification product was obtained by PCR using genomic DNA extracted from animal tissue as a template.

It is certified that this product meets the above specifications, as reviewed and approved by the Quality Department of DSS Takara Bio India Pvt Ltd.
